

More info about the recipient donor

At the Edinburgh Royal Infirmary of Edinburgh the renal recipient transplant coordinators care for patients who require kidney and combined kidney / pancreas transplants and islets have the following role:

- Assessment
- Organisation of transplant
- Patient support
- Patient education
- Follow-up

The process for kidney transplantation from assessment through to transplant is explained in the following [booklet](#).

The process of simultaneous kidney pancreas and pancreas for islets is explained in the following [booklet](#).

Further information about transplantation

[See the links at the foot of the Kidney Transplantation](#) page in [EdRenINFO](#). We produced the Transplant booklet, photo-story, and other information.
